FINAL INTERNATIONAL UNIVERSITY

ETHICS COMMITTEE PROJECT INFORMATION FORM

1. Write a detailed description of your study including your hypotheses.

2. Explain the data collection plan, specifying the methods, scales, tools, and techniques to be used. (Please hand in a copy of all types of scales and questionnaires to be used in the study along with this document.)

3. Write down the expected results of your study.

4. Does your study involve items/procedures that may jeopardize the physical and/or psychological wellbeing of the participants or that may be distressing for them? If yes, please explain. Specify the precautions that will be taken to eliminate or minimize the effects of these items/procedures.

5. Will the participants be kept totally or partially uninformed of the aim of the study? If yes, explain why. Indicate how this will be explained to the participants at the end of the data collection in debriefing the participants.

6. Indicate the potential contributions of the study to your research area and/or society.

7. Write down the titles, and dates of previous research projects you have conducted or that you have taken part in and the names of funding institution(s) if any.
