Our Lady of Fatima, Port Harcourt, Rivers State, Nigeria.

September 2006-July,2009.

### PRIMARY EDUCATION

Globetty Primary School, Aba, Abia, Nigeria.

From year 2000 to year 2006.

## **WORK EXPERIENCE**

- Part-time Instructor of Physics 101 and 102, Biology, and Chemistry, at Cyprus West University in Famagusta, North Cyprus from September 2023 and still ongoing. Involves preparing lecture notes, teaching students on the basics of these courses and also preparing their examinations and computing grades into the school SIS.
- Research Assistant at the Faculty of Pharmacy at Cyprus International University, from 2021 to 2022, during which I actively participated in file sorting, bookkeeping, tutoring students for lab sessions, taking inventory of chemicals available and proper storage. I also was part of the graduation committee responsible for organizing the arrangement and progression of graduating students for easy traffic. During office hours, I had the privilege of counselling students regarding their academic ambitions and progress.
- Intern doctor in Asaba, Nigeria, from 2018 to 2019 during which I participated in surgeries, and simple procedures, delivered presentations to hospital staff, mentored a student in the emergency ward, participated in uploading research data to SSPS software for a study on the impact of gas flaring in rural communities.
- However, despite my Bachelor's degree, I developed a love for teaching and hence, I decided to further my studies in order to get a PhD degree and be qualified to teach in any health-related field.

## **SKILLS**

- Writing is a talent I discovered during my early childhood years while reading numerous books. I write creatively for my friends and family at home and at my local church community to enjoy and learn from with good and positive feedback. I have my own website at WordPress where I post most of what I write creatively. Being a PhD Research Candidate required me to qualify first with a Master's thesis which is recorded in the Cyprus International University school library. I plan to write more in any career path I choose to follow through.
- Tailoring is a skill I picked up during my days as an Intern Doctor in Nigeria when the hospital had to close down for political reasons. I monetize this skill to make ends meet by making DIY crafts, which came in handy particularly during the COVID era and shortly afterwards.
- Teaching was birthed during my year as an intern doctor from the multiple presentations that I had to present to fellow doctors and nurses and medical students. The positive feedback and sharing of my slides helped me develop interest in it. Also, being a just-graduated doctor in a foreign language speaking country led me to aspire to different career path to make ends meet and to help students navigate through their academic life.

- English Language Literacy earned me a pass in my IELTS exam preceding my university education. Also, writing and speaking regularly has helped improve my fluency and literacy in this language.
- My A1 certificate in Turkish was earned from the Alpha Language and Education Center in North Cyprus. I also participated in a free online course by the Yunus Emre Institute and that helped develop my understanding of basic words and sentences and to speak them as well.
- Computer literacy developed from childhood through focused computer classes on the Microsoft programs. Regular writing and reading have also sharpened this skill over the years.

## **HONOURS**

- Qualified PhD Candidate of Pharmaceutical Sciences with cGPA of 3.82, in February 2024 with both written and oral interview scores of 96 and 90 respectively, with 5 juries in attendance.
- Master's degree in Pharmacognosy with thesis with a cGPA of 3.42, which qualifies me to teach and to carry out a Pharmacognostic Research. I have the knowledge of plant studies and how to perform an effective plant study to extract crude component and identify useful chemicals that can be used as drugs.
- Doctor of Medicine with a cGPA of 3.2, which qualified me a doctor able to diagnose and treat diseases in any country provided I have a license.
- Certificate of Participation in the "Creative Writing Symposium" held on 09.05.2023, organized by the Cooperation of CIU Social Activities and Student Clubs Coordination Office and Medi Foundation.
- Certificate Of Excellence in Peer Reviewing from BP International, Asian Journal of Food Research and Nutrition, Journal of Experimental Agriculture for my active participation in reviewing academic articles.

## **STRENGTHS**

- Task-oriented
- Efficient
- Reliable
- Creative
- Enthusiastic
- Consistent
- Persistent
- Loyal

## **WEAKNESSES**

- Insecure
- Perfectionism
- Prefer working alone
- Self-critical
- Not spontaneous
- Too much detail.
